"The KCS Certified Publisher program gave an incredible boost to our KCS program, and reminded our engineers not only what to do, but why they're doing it. We learned that the right preparation for the certification exam made all the difference: with it, people mostly passed. Without it, they didn't."

- Cheryl King
KCS Program Manager, Novell

The KCS Certified Publisher program is administered by the KCS Academy, a subsidiary of the Consortium for Service Innovation (CSI). KCS is a service mark of the CSI.
